CREATIVE TECHNOLOGY CAN CHANGE THE WORLD AND YOUR BUSSINESS

Sciensor offers a special cooperation to facilitate the development of innovative solutions to address your business challenges. The collaborations are aimed at pushing innovative Research & Development activities from non-profit foundations to private institutions in various fields of the environmental research, including next-generation of environmental resources management and protection.

Differently from products and services provided by Sciensor through Smart projects, Innova projects try to attract investors to get financing/sponsors for the development of unique service and product, which provides innovative solution for the investors challenges. The concepted product will be shared between parts, according to a deal made in the earlier stages.

## Creating a bridge between business and state-of-the-art science

### IoT BASED LOW-COST TURBIDITY PROBE TO MEASURE CONTINUOUSLY THE WATER TURBIDITY, A KEY INDICATOR OF WATER QUALITY

Accurate methods to measure continuously water turbidity often rely on expensive equipment or labour-demanding procedures, which may cost more than 7000 Euros. Here in Sciensor we are developing a low-cost turbidity probe, which may cost less than 100 Euros. The probe is under development, but we hope that it will measure turbidity continuously. The device does not only capable to measure and record data to a SD card, but also send data to an app.
